

Project Submission & Presentation Guidelines – CS-103

You have now been introduced to key tools and concepts including **Excel, Power Query, Data Modeling, SQL (with practice), and Power BI**.

As part of your course requirements, you are expected to apply these skills in a **group project**, where you will:

- Develop a **complete Power BI dashboard**
- Perform **data cleaning and transformation using Power Query**
- Apply **basic data modeling concepts**
- Demonstrate **SQL queries (e.g., SELECT, JOIN, WHERE, GROUP BY)** where relevant
- Prepare **professional documentation**
- Deliver a **structured presentation**

Important Deadlines

- **Project Submission (ZIP format):** *27 April 2026*
- **Presentations:** *Last week of April*

Submission Instructions

- Submit **all project files in a single ZIP folder**
- Use a **proper and consistent file naming convention**
- Ensure your submission includes:
 - Power BI file (.pbix)
 - Supporting datasets
 - SQL queries (submit SQL file as well)
 - Documentation/report

Evaluation Criteria

Your project will be assessed based on:

1. **Technical Implementation**
 - Dashboard design and usability

- Effective use of Power Query and data modeling
- Proper use of SQL queries

2. Documentation Quality

- Clarity, structure, and professionalism

3. Presentation & Defense

- How effectively you present your work
- Your ability to answer questions and justify your approach

 **Important:** Marks are not based only on what you build, but also on how well you **explain, justify, and defend your work**, including your SQL logic.

Best of luck — approach this as a real-world business analytics project, not just an assignment.
